Micro Works Technology Solutions ®

"Your Trusted IT Solutions and Security Partner!"

For over 30 years corporate, healthcare, and educational customers have relied on Micro Works to provide top-notch solutions, excellent pricing, and elite customer service. Our team will help you maximize the performance of your existing infrastructure and plan your future, all while maintaining your budget. Our talented technicians and engineers will exceed your expectations, and have a wide range of experience in all areas including:

- Onsite system installation, device imaging, cabling services, and network deployment - Wireless site assessments and heat mapping

- 24x7 managed detection & response to contain threats before they impact your business - Penetration testing & compliance advisory services

- Innovative security, storage and virtualization solutions/hyper-converged architecture - Amazon (AWS) & Tierpoint Cloud/Colo

- Automated backup solutions and protection to keep your environment rock solid - never worry about data loss on servers, user laptops, or in the cloud again! Cutting-edge disaster recovery and replication - Email archive and encryption, cloud and on premise

- Microsoft Office 365 and Azure - Great pricing AND deployment services! Ask about our licensing "True-Up" services too

- Help desk services, telephone language translation, remote office support, network monitoring services, and nationwide onsite staff augmentation

- Office moves, conference room set-up & solutions, data center relocation services, equipment recycling and hard drive destruction

- Full spectrum contract manufacturing - customized packaging/labeling, specialized cases/enclosures, inventory and asset tracking services, client specific hardware/software staging, product warehousing, complete handling and delivery service to your end users

We provide IT solutions to streamline your business and save you money!

Let Micro Works work for you!

Through our exclusive security partnerships we work closely with our clients to identify vulnerabilities in their environment and eliminate them, proactively and completely. This solid, carefully selected security ecosystem allows us to help customers to understand how complex technologies can work together, and to select the best products to protect their assets. As cyber threats continue to evolve and become more sophisticated, and networks continue to diversify, protecting your data must be a number one priority! Huge stores of data, cloud infrastructure, and mobile computing have only added to the challenge (by extending the business beyond corporate firewalls, creating risky landscapes).

Defending your organization requires comprehensive policies and controls, monitoring your environment for future changes, constantly assessing risk levels, and skillful implementation of the correct security solutions. We recognize that each business has unique needs and we will help guide you to manage threats, mitigate risks, and achieve the particular levels of compliance that your specific business requires.

Today's IT departments are asked to do more with less in the face of increased financial and regulatory scrutiny. The Micro Works team will provide technical expertise and ensure that our solutions will meet your needs within budget, and achieve your business objectives. Technology will drive your future; with Micro Works at the wheel, you can be sure it takes you where you want to go….
